Environmental Policy

CFM is committed to minimizing adverse environmental effects from our operations and fostering a culture of sustainable environmental management.

CFM's environmental strategy is working towards developing a system certified to AS/NZS ISO 14001, meeting environmental legislative requirements and applying the principles of best practice environmental management to our operations. CFM is committed to applying proactive approaches to environmental stewardship through:

- Implementation of innovative best practice approaches to environmental management.
- Integration of sustainable environmental management practices into our activities.
- Establishment of clear lines of accountability for achieving the environmental outcomes required.
- Conducting relevant environmental education and training to improve awareness, knowledge and skills amongst our staff.
- Measurement and reporting of environmental performance through use of Performance Standards and Key Performance Indicators and taking action to improve performance through regular and formal reviews.
- Working cooperatively with our clients in exercising environmental due diligence at all stages.
- ***Reducing our Carbon Footprint by introducing a paperless operation system***

CFM Air acknowledges this environmental policy as a commitment that involves cooperation and consultation with all stakeholders to meet the company's business objectives.
